Doug-

An approval letter has been drafted to go to the Navy for the plant 6-2 pilot but it hasn't gone out yet. I expect it will go out before the meeting.

John

Thanks John

We have that down as item 7.

MWD expects to respond to the Navy and NG comments on the MWD sampling proposal. Hopefully that will happen before the meeting. I can understand NG and Navy wanting to make sure the sampling is done properly (and if they were doing it we would want to have a sampling plan, qapp etc) especially if the information is going to be used against them.

However, if the parties can't work things out in short order should DEC (and EPA) just tell Navy and NG to give MWD access and that if they are concerned about a properly designed program put their comments on record (and/or go out and implement the program as they would like it implemented). This is something we should hash out a bit before our meeting on Tuesday. My initial thoughts are let's have a back and forth discussion, but if they can't reach agreement or if the program gets to expensive for MWD, we ask the PRPs to provide access to the wells and let MWD do their thing.

Any word on the approval for plant 6-2 pilot?

Thanks

Doug-

Jim was supposed to fly in to Philadelphia on Sunday evening. That didn't happen due to the storm. He contacted us by e-mail Monday morning to say he was still in Africa but was hoping to fly to Chicago later Monday. We haven't heard any further updates yet!

We reviewed the draft Agenda and it looks good but we would like to add one item: the Water District proposal for Compound Specific Isotope Analysis (CSIA).

Hi

I am not sure when Jim returns. Lora Fly did not have any comments on the agenda; I was hoping to get it out to the larger group of attendees today. Are you guys ok with that (note there are a couple of things other than the Saladino Report that DEC will report out on....mostly minor status stuff).

Any word on the approval for the Plant 6 pilot study; during the monthly coordination call last week Bob said he was going to try to track it down. Would be good to have that out before the meeting next week.

Thanks

Doug

Lora/Ed

Please take a look at the draft agenda.

We incorporated many of your suggestions regarding former agenda items 2 and 3. A few agenda topics (or subtopics) were retained even though you reported you would not have any new updates for the topic; we think it is best to continue to include these on the agenda so that even if we have nothing new to report, it will serve as a placeholder to remind us to think forward to what might be accomplished for discussion at the next quarterly meeting.

Let me know if you have any further additions or edits. If there are other topics associated with the delineation, design, capture zone analysis etc that you might want have specific mention on the agenda please let us know.

I plan to distribute a draft agenda to the larger group next week.

Thanks

Doug
